Creative Coding

My results are what I expected. I know that not everyone is 100% any of these categories but I was a bit surprised at how low the auditory and tactile scores were. As for these styles being applied in class, I feel like my wants are already been addressed. In situations where we must navigate a new area there is a video tutorial for us to utilize. If there isn't that's because the information was somewhere else or a quick google search or email can present us with the information. As of now there is nothing else that you can do! It has been really helpful to be able to rely on sending you emails and knowing I will get a response at some point. Many of my teachers last year would NEVER respond to their emails leaving me having to guess and feel uncertain about their assignments.

1. What kind of book would you like to read for fun?

A book with lots of pictures in it

2. When you are not sure how to spell a word, what are you most likely to do?

Write it down to see if it looks right

3. You're out shopping for clothes, and you're waiting in line to pay. What are you most likely to do while you are waiting?

Fidget or move back and forth

4. When you see the word "cat," what do you do first?

Say the word "cat" to yourself

5. What's the best way for you to study for a test?

Make up index cards that you can review

6. What's the best way for you to learn about how something works (like a computer or a video game)?

Get someone to show you

7. If you went to a school dance, what would you be most likely to remember the next day?

The dance moves you did and the food you ate

8. What do you find most distracting when you are trying to study?

Loud noises

9. When you are angry, what are you most likely to do?

Put on your "mad" face

10. When you are happy, what are you most likely to do?

Smile from ear to ear

11. When in a new place, how do you find your way around?

Look for a map or directory that shows you where everything is

12. Of these three classes, which is your favorite?

Gym class

13. When you hear a song on the radio, what are you most likely to do?

Sing or hum along with the music

14. What do you find most distracting when in class?

Lights that are too bright or too dim

15. What do you like to do to relax?

Read

16. What is the best way for you to remember a friend's phone number?

Say it out loud over and over and over

17. If you won a game, which of these three prizes would you choose?

A poster for the wall

18. Which would you rather go to with a group of friends?

A movie

19. What are you most likely to remember about new people you meet?

What you talked about with them

20. When you give someone directions to your house, what are you most likely to tell them?

A description of building and landmarks they will pass on the way

Your Scores:

- Auditory: 20%
- Visual: 55%
- Tactile: 25%

Visual

If you are a visual learner, you learn by reading or seeing pictures. You understand and remember things by sight. You can picture what you are learning in your head, and you learn best by using methods that are primarily visual. You like to see what you are learning.

As a visual learner, you are usually neat and clean. You often close your eyes to visualize or remember something, and you will find something to watch if you become bored. You may have difficulty with spoken directions and may be easily distracted by sounds. You are attracted to color and to spoken language (like stories) that is rich in imagery.

Here are some things that visual learners like you can do to learn better:

- Sit near the front of the classroom. (It won't mean you're the teacher's pet!)
- Have your eyesight checked on a regular basis.
- Use flashcards to learn new words.
- Try to visualize things that you hear or things that are read to you.
- Write down key words, ideas, or instructions.

- Draw pictures to help explain new concepts and then explain the pictures.
- Color code things.
- Avoid distractions during study times.

Remember that you need to **see** things, not just hear things, to learn well.
